

Dental Solutions

Midmark Veterinary
Products and Services

Midmark is more than
just a manufacturer of
animal health products.
We are a provider of
innovative solutions
that work for you.

Midmark Veterinary Dental Solutions...a complete, integrated suite to make your practice more efficient.

Get the equipment you need to outfit your new dental suite from one trusted source. Care for your patients without the worry and aggravation of sourcing and maintaining equipment from multiple manufacturers.

The innovative design of the VetPro™ 5000 Dental Delivery System is just one example of how we can help you be more efficient. Position the tools you need where you need them while simultaneously eliminating the problem of tangled hoses... a Midmark exclusive in veterinary dental equipment!

Providing quality dental services is not only good for your patients, but a growing opportunity for increasing revenue in your practice. However, equipment options are scattered and procedures can be lengthy without the right skills and equipment. We have brought together field research in the veterinary dental space and our commitment to efficient patient care to create Midmark Veterinary Dental Solutions.

The **Veterinary Dental Suite from Midmark** provides you with a host of innovative products to help increase efficiency and productivity. The ergonomic design creates an efficient workspace at the point of care. The innovative design of the dental delivery system and the height adjustability of the Canis Major™ Lift Table allow you to put the patient and your tools exactly where you need them, saving time and physical strain during dental procedures. The VetVision™ line of veterinary-specific imaging products are accurate and easy to use.

The Veterinary Dental Suite also includes the standard features of **Midmark's Veterinary Dental Station: casework, featuring sturdy, steel frame construction; our VetPro™ oil-free, worry-free, hassle-free solution for dental delivery; Matrix small animal anesthesia machines; ergonomic seating; quality, shadow-reduced lighting; and other options to customize your dental suite.**

The Veterinary Dental Station from Midmark features a sturdy steel frame which is more durable than wood/laminate, but warmer in appearance than stainless steel. Add our dental delivery system, anesthesia, quality lighting and seating for a customized solution.

Veterinary Dental Station

Veterinary Dental Suite

Get the oil-free, worry-free, hassle-free solution to your mobile dental delivery needs. The **VetPro™ 1000** boasts oil-free compressor technology, preventing oil in the system to provide a clean, healthy work environment for you, your staff and your patients.

Get the best in small animal anesthesia. Fifty years of quality and experience go into every Matrix anesthesia machine. Give your patients the best and enjoy the peace of mind that comes from partnering with Midmark.

Get a light designed specifically for dental procedures. Our advanced lighting design helps to deliver a truer, shadow-reduced white light to properly identify shades, see details and diagnose tissue. Customizable features simplify usage of the light, while minimizing fatigue, time and motion.

Canis Major™ Wet Treatment Table

Put your patient right where you want them with the first and best adjustable-height, lifting wet table. Patients up to 300 lbs are quickly and easily positioned before, during and after procedures.

Wet Treatment Table

Enjoy all the benefits of a wet procedure table with the added benefits of Midmark's steel frame construction ... more durable than wood and laminate, but warmer in appearance than stainless steel.

The Cardell® MAX-12 HD Multiparameter Monitor contains the world-leading Cardell® veterinary blood pressure technology, Nellcor's all-digital Oximax® pulse oximetry and Oridion's Microstream® CO₂ technology.

These are complemented with a diagnostic-quality ECG, respiration via CO₂ and temperature.

- 12.1" high-definition color screen with ultra wide viewing angle
- Built-in, 3-channel graphical printer
- World-class Cardell® BP, Nellcor SpO₂ and Oridion low-flow CO₂ technologies
- 8 waveform channel display, including 4 vector simultaneous ECG
- 120-hour graphical trends; 12-minute full recall ECG memory
- 4 veterinary specific alarm defaults (dog, cat, horse, other)

VetVision™ Complete partners the best-of-breed VetVision™ DC dental X-ray with a high resolution digital sensor in one convenient, easy-to-use system.

Capture images using our own easy-to-learn and simple-to-use veterinary imaging software.

- The latest DC X-ray technology with a 0.4mm focal spot
- A high resolution digital sensor connected at the X-ray head
- The sensor is stored directly on the arm where it is safe and handy
- Sensor can be easily removed for cleaning or other storage
- Available with #1 or #2 size sensor
- 56", 66" or 76" arm reach
