

SOLID SURFACE
COUNTERTOPS

S E L E C T I O N S

DuPont™ Corian® is a unique solid surface material made from an advanced blend of natural minerals and acrylic polymer. Since its creation 35 years ago, Corian® has proven itself to be a remarkably durable, versatile material that's easy to live with in a healthcare environment.

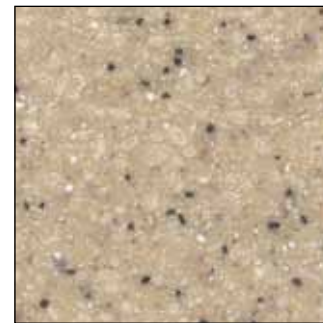

The remarkable durability of Corian® allows it to survive the impacts, nicks and cuts that mar most surfaces. And, Corian® is renewable. With the ability to buff away nicks and scratches, Corian® countertops last a long, long time, postponing the need for costly replacement.

Corian® is easy to clean. Because Corian® is non-porous, stains do not penetrate the surface. With proper cleaning, Corian® resists the growth of mold, mildew and bacteria.

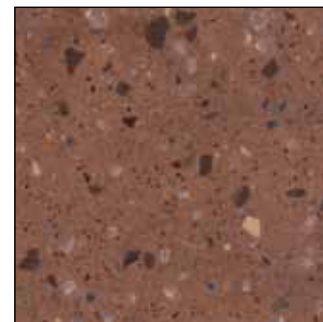

Midmark offers Corian® in 15 beautiful, standard colors. More than 100 additional colors are available by special order. A seamless, integrated white Corian® sink with matching faucet and soap dispenser is standard on sink cabinets. An optional under mount stainless steel sink with matching faucet and soap dispenser is available.

To assist in your selection of Midmark countertops, upholstery and casework panels, please access our Dental Color Selector at midmark.com. For additional information on Corian®, visit corian.com.

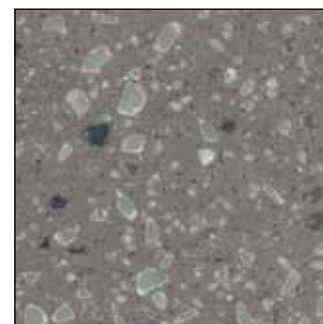

The color swatches shown are the best representation of the original material. Actual color may vary slightly.
